Comments The construction for this home is pier and beam with a crawl space. There are 2 crawl space entrances, but were covered with plywood to prevent the entrance of varmits,thus, cannot be considered as flood vents. The flood vent area is only 798 sq. in. for a floor space of 2340, (less than 1 sq.in/1 sq.ft.) so the dirt floor in the crawl space is the top of the bottom floor. The outside utilities are an AC condenser and swimming pool filter and backwash system. The house measurements for this elevation certificate were taken on the exterior of the house, so they will not match interior
